Mylab Coviself™

COVID 19 Ag Test (Nasal / OTC Home)

Investigation	Result
Test Result	Antigen Negative
Test Date	Jan 24 2022 10:27AM
Method	COVID -19 Lateral Flow Test (Rapid)
Cassetteld	CoviSelf0000466154

As per ICMR guidelines : In case of Antigen Negative result

In case of Negative Result All symptomatic individuals who test negative by RAT should get themselves immediately tested by RTPCR. This is especially important as the RATs are likely to miss few positive cases presenting with a low viral load. All RAT negative symptomatic individuals may be treated as suspect COVID-19 cases and are advised to follow the ICMR/MoH&FW home isolation protocol while awaiting the RTPCR test result.
